Measurement Scale for Scout Rings

Important

When sending in an order for rings please be sure and give the correct size and colour design required.

How to Find the Size of Rings Required

Measure around the finger with a slip of paper or a piece of string, then compare it with the ring scale as above. If the paper or string should measure between the sizes it is advisable to order a half size larger, i.e.; if your finger measures between sizes 6 and 7 you should order size 6 1/2 and so on.
